

Josiah Luke Randazzo
(719) 640-1108
JL_Randazzo@hotmail.com

Objective	Launch my software development career in an ambitious and challenging internship.
Education 2015-Present	<i>Metropolitan State University of Denver, CO</i> Computer Science Major, B.S., and Mathematics minor, projected graduation in Summer/Fall 2019. 3.92 GPA.
Skills	Object-Oriented Programming, most familiar with C#—NUnit testing (used for TDD), Moq, and many other libraries—very familiar with Java as well; object-Relational Mapping experience, primarily with the Entity Framework; MSSQL; Experience with the GNU Compiler Collection, C, C++, and system calls in Linux and Windows; Functional Programming, some familiarity with LISP and Scala, and frequent use of C#'s higher-order functions and Linq libraries; some experience with Python and JavaScript (jQuery) in addition to HTML and CSS; version control experience with git (github.com and bitbucket.com)—frequently used within Visual Studio, from the command line, as well as in SourceTree; Agile experience (Scrum).
Portfolio	Refer to www.github.com/jl-randazzo/someportfolio . It's a combination of real problems I solved and academic work. Most of what's available in this repository was written alongside a team. I included a personal project I've been working on with a friend written in C#; I invite you look. It nicely demonstrates my comfort level with O-O programming, design patterns, data structures, using mathematics in my code, and C#. Go to SomePortfolio\C#\HIGHLIGHTED_Observer_Subjects. Feel free to peruse the rest of my GitHub account as well; at this point, it's mostly a hodgepodge of classwork and some independent work. In the near future, I'll be making substantial uploads.
Employment 2015-Present	<i>Scott Friedman and Associates, Golden, CO</i> Hired as an Administrative Assistant and Digital Content Manager. Responsibilities include editing videos, audio, and company literature; providing technical support for hardware, software, network, and email-related issues; drafting design and marketing materials; updating the company's website and social media presence; maintaining client mailing lists and databases; keeping calendar up to date; and drafting, sending, and keeping record of client contracts, payments, and questionnaires.
